**Fundamental questions
Elemental answers**

Manuscript accepted? Congratulations!

It is now time to choose your article licence. Corresponding authors from this institution can make articles gold open access at no cost, because your institution has already paid the article processing charge.

To take advantage of this, click the link in your acceptance email and follow these steps:

Step one: go online

Your link will take you to this web page.

Your name should be listed as the corresponding author.

Scroll to the bottom and press start now.

Article Licensing

1: START > 2: CHOOSE > 3: SIGN > 4: REVIEW

LET'S START

These are the details that were provided during article submission. If you need to make any changes you will be able to do so as part of the proof correction process.

ARTICLE DETAILS

Poly(N-isopropylacrylamide) modified polydopamine as temperature-responsive surface for cultivation and harvest of mesenchymal stem cells

Journal	Analyst
Manuscript ID	C7AN02336G
Manuscript Type	Paper

AUTHORS

Full Name	Email	Institution	Corresponding
Author A	authora@inst.com	Institution 1	Yes
Author B	authorb@inst.com	Institution 2	No

FUNDERS

Funder	Funder ID	Grant Number
None found		

Click the "Start Now" button to choose a publication route and sign your licence to publish.

START NOW

Step two: pick your route

1: START > 2: CHOOSE > 3: SIGN > 4: REVIEW

CHOOSE A PUBLICATION ROUTE

Please select a publication route for your article. You can choose from standard (traditional) publication or gold open access. See our website for more information about [open access](#).

Our system will automatically identify you as being from a Read & Publish institution based on your email address.

UNIVERSITY OF XXXX

Your institution has a Read & Publish open access agreement with the Royal Society of Chemistry, which means that your institution will automatically cover the article processing charge (APC) allowing you to publish your article gold open access.

STANDARD PUBLICATION

Version of record available to institutions with a subscription

Accepted manuscript available after embargo (allows the accepted manuscript to be made green open access via a repository after 12 months)

Author retains copyright

Others have restricted sharing and reuse rights

FREE

No article publication charges

Select our standard licence

GOLD OPEN ACCESS PUBLICATION

Version of record is freely available to everyone

Open access is immediate upon publication (payment of article processing charge may be required before publication)

Author retains copyright

Others can share and reuse

Membership or institutional discounts may apply

FREE

No payment required

Select an open access licence

Select gold open access and press continue.

Select a publication route to continue.

CONTINUE

What happens if I select standard publication?

If you pick standard instead of gold open access, you can continue, but bear in mind that your article will only be accessible to readers who subscribe to your chosen journal.

You have selected that you don't wish to comply with your institute's preferred mode of publication (provided at no additional cost to yourself through your institute's Read & Publish agreement with us). Please confirm that you wish to continue.

Step three: sign your license

If you picked gold open access, you will only be shown relevant licence options.

Article Licensing

1: START > 2: CHOOSE > 3: SIGN > 4: REVIEW

SIGN YOUR LICENCE ONLINE

We offer a choice of two Creative Commons licences. Creative Commons is a global non-profit organisation, offering free open access licences. Further information is available on the [Creative Commons website](#). You may select the appropriate licence according to your funding body and research institute requirements or your personal choice.

CC BY

Creative Commons Attribution

Under this licence other users are free to:

- copy and redistribute the material
- reuse, adapt, and build upon the material **for any purpose, even commercially**

The user must give appropriate credit to the original copyright owner

Select CC BY

CC BY-NC

Creative Commons Attribution Non-Commercial

Under this licence other users are free to:

- copy and redistribute the material
- reuse, adapt, and build upon the material **but not commercially**

The user must give appropriate credit to the original copyright owner

Select CC BY-NC

Check the full terms of each licence.

Once you are happy, agree to your preferred option and press continue.

Select an open access licence. You will then need to agree to the licence terms.

CONTINUE

Step four: confirm your choices

1: START > 2: CHOOSE > 3: SIGN > 4: REVIEW

REVIEW YOUR DETAILS

Please check the details you have entered and ensure they are correct. If you need to make any changes to the article details you will be able to do so as part of the proof correction process.

ARTICLE DETAILS

Article title	Poly(N-isopropylacrylamide) modified polydopamine as temperature-responsive surface for cultivation and harvest of mesenchymal stem cells
Journal	<i>Analyst</i>
Manuscript ID	C7AN02336G
Manuscript Type	Paper
Authors	Author A, Author B

Double-check that your publication route and licence are correct.

PUBLICATION ROUTE

Gold open access publication

The payment box will confirm that all charges have been covered by your institution.

LICENCE

CC BY - Creative Commons Attribution

PAYMENT OPTIONS

Paid by Read & Publish agreement - University of XXXX

Your institution has a Read & Publish open access agreement with the Royal Society of Chemistry. The cost of the article processing charge (APC) has been paid by your institution.

Press confirm and finish to complete the steps.

CONFIRM AND FINISH

Unanswered questions?
